PROJECTS

Budgeting System | Java, JavaFX, SQL

May-2025

- Developed a budgeting system to help users create and track budgets based on categories, spending limits, and visual analytics, following the MVC architecture for clean separation of concerns.
- Designed and implemented SQL database schemas for accurate budget tracking and integrated a Java backend with JavaFX UI for an intuitive experience.
- Collaborated with a cross-functional Agile team, applying Scrum methodology with sprints, standups, and retrospectives.
- Utilized Trello boards for sprint planning and task tracking, improving sprint efficiency by ~25%.
- Authored Software Requirements Specifications (SRS) and Design document, ensuring clear requirements, architectures, and maintainability.
- Delivered a fully functional prototype within 6 sprint cycles, showcasing strong teamwork, project management, and technical execution.

Smart Vaccination Management System | Requirement Engineering & Documentation

December 2023

- Collaborated on designing a vaccination tracking and management system to reduce immunization errors and streamline vaccination records.
- Conducted 10+ stakeholder and end-user interviews to gather requirements and feedback for system improvements.
- Authored a detailed Software Requirements Specification (SRS) document, ensuring all requirements were captured.
- Applied Agile principles during requirement collection and feedback integration, enabling iterative refinement of system features.

WORK EXPERIENCE

AV/IT Student Assistant | University Student Union, CSUSM

September 2024 - Present

- Performs setup and operation of small to large-scale audiovisual systems for live events, ensuring a flawlessly executed experience for all patrons and guests.
- Provides IT-related troubleshooting, resolving technical issues for clients to ensure all event needs are met.
- Utilizes Basecamp application to maintain a comprehensive digital calendar, keeping track of all on-campus event timelines and equipment needs.
- Collaborates with event coordinators and staff to determine project priorities and timelines.

EDUCATION

California State University, San Marcos (CSUSM)

Expected in December 2026

BS in Software Engineering (GPA: 3.72)

LEADERSHIP & PROJECT MANAGEMENT

Business Fest (BFest) | Organizing Team Member

- Planned and executed a successful on-campus event that showcased the business ideas of students based on the theme of sustainability, attracting over 160 student participants.
- Collaborated with the team using project management tools like Asana and Microsoft Teams to streamline planning, coordination, and communication.

Hult Prize | Planning Team Member

- Contributed to planning and executing a major on-campus event for a globally recognized social entrepreneurship competition, successfully supporting all participating student teams.
- Worked closely with the event planning committee to manage all operational aspects, from pre-event preparation to day-of execution.

SKILLS & INTERESTS

Skills: Microsoft Office (Excel, PowerPoint), Overleaf (LaTeX), SQL Database, Agile(Scrum), Organization and Time management, Team Collaboration.

Interests: Data visualization and analytics, Project management and teamwork, root cause analysis, Badminton.
